

Earth's Structure

Earth has 3 main layers, starting at the centre, they are:

1. The _____ is broken into two sections. The _____ and the _____.
 - a. The _____ core is _____ and made of _____ and _____. It is the hottest part of the earth.
 - b. The _____ is a _____ layer of molten _____ and _____.
2. The _____ is made of semi-_____ rock called _____.
3. Finally, the _____ is a thin layer of _____ rock that we live on.

Earth's Structure

1. The _____ of the Earth is one hot place. In fact, some of it is liquid or _____.
2. The _____ though, is made of rock that has cooled to a hard outer skin. It is also deepest in areas with _____.
3. Beneath the ocean lies the _____ crust. This crust is made of _____ lava flows, which have erupted from _____ over millions of years.
4. Below the lithosphere is a hotter portion of the _____ that is always moving. It is this movement that splits the lithosphere, causing volcanoes and _____.
5. The _____ are thicker and lighter. They float on top of the mantle, sort of like chunks of ice floating on a lake.

A	I	N	T	E	R	I	O	R	T	A
