

The Crust - How it Moves.

Question:

How is the earth's structure just like a hard-boiled egg? Discuss with your group and fill it out below. Include a diagram!

The crust around the earth's surface is not smooth, it is broken into lots of different sections. These sections are called _____. There are big plates, and there are small plates. Each one is moving in a different direction. They move very slowly. About the speed that your _____ are growing. We will learn more about their movement later!
